# contactmini

Quick Fitting Guide

1 Connect 4-pin programming cable to HI-PRO interface and to programming socket of contact mini which is located under the housing cover. Programming without or with battery possible!
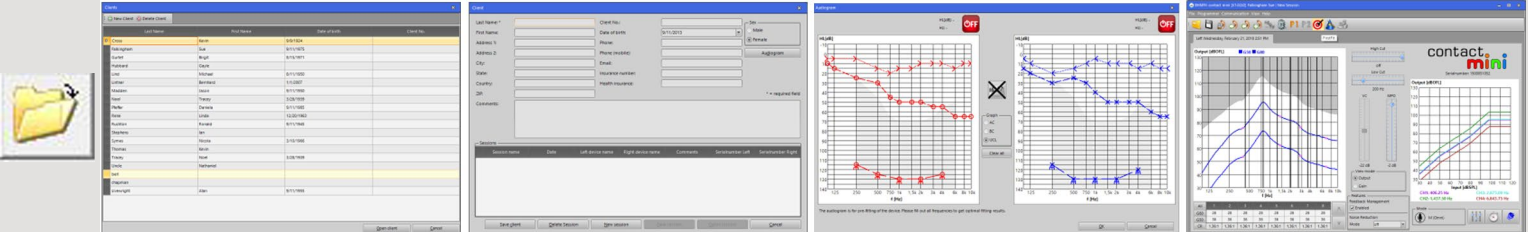

4-pin programming socket

2 Start program. (BHMFit contact mini)

3 Open customer or create „New Costumer" and enter audiogram. (you can also use in-situ function see SW user instruction) Open session or create „New session".
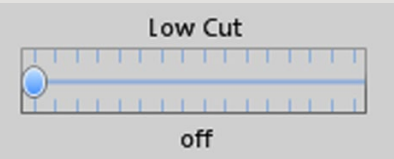

4 Press „First-Fit". (Button)

5 Adjust gain - you can select each field, column and row.

All	1	2	3	4	5	6	7	8	
G80	28	28	28	24	24	24	24	24	∧
G50	40	40	40	36	36	36	36	36	
CR	1.67:1	1.67:1	1.67:1	1.67:1	1.67:1	1.67:1	1.67:1	1.67:1	∨

6 Adjust Low Cut. (activated Low Cut improves speech understanding and increases lifetime of battery)

Low Cut
off

7 Adjust MPO. (activated MPO avoids uncomfortable loud noise)

MPO
-10 dB

8 Store setting in the aid and save session when setting is perfect.

9 Exit program by „File - Exit". Disconnect programming cable and mount housing cover carefully.

For more details and features read the software user instruction!

BHM
Nice to hear You again
